IDEATION PHASE

Brainstorm & Idea Prioritization

Student: Sheetal   Project: Global Fuel Prices and Taxation Trends Dashboard

Objective

Generate dashboard ideas that help explain differences in global fuel prices, taxation, subsidies, and crude-oil trends.

Brainstormed ideas

• Compare average petrol, diesel, and LPG prices country by country.

• Compare tax percentage with petrol prices to explore the relationship between taxation and consumer fuel costs.

• Track Brent crude oil prices over time.

• Compare prices and tax levels across country income levels.

• Compare petrol prices by subsidy level.

• Combine the most useful charts into one dashboard for policy, supply-chain, and economics users.

Prioritization criteria

• Relevance to the three scenarios

• Availability of fields in the supplied dataset

• Ease of interpretation

• Potential to support evidence-based questions

Selected priorities

• Country-wise fuel-price comparisons

• Tax and income-level analysis

• Subsidy-level comparison

• Brent crude trend over time

S. No.	Team Member	Idea / Suggestion	Category	Group No.
1	Sheetal	Compare petrol, diesel and LPG prices by country.	Price comparison	Individual
2	Sheetal	Explore tax percentage against petrol prices.	Taxation analysis	Individual
3	Sheetal	Track Brent crude prices over time.	Trend analysis	Individual
4	Sheetal	Compare fuel/tax patterns by income level.	Economic analysis	Individual
5	Sheetal	Compare petrol prices by subsidy level.	Policy analysis	Individual

Submission note: These are filled content drafts prepared from the project details available. Check them against the official SkillWallet template fields and add any required official Team ID or institution-specific information before submission.
