PROJECT PLANNING PHASE

Tasks, Deliverables, and Risks

Student: Sheetal   Project: Global Fuel Prices and Taxation Trends Dashboard

Planned workflow

• Review project overview and scenario questions.

• Inspect the dataset columns and data types.

• Create and validate the Tableau worksheets.

• Assemble and format the dashboard.

• Publish to Tableau Public and save a local workbook copy.

• Prepare project documentation, screenshots, and demo video.

• Upload required files and links to the submission location.

Deliverables

• Tableau workbook (.twb or packaged .twbx if available)

• Published Tableau Public dashboard URL

• Completed phase documentation PDFs

• Demonstration video URL

• GitHub repository URL containing project files

Risks and mitigation

• External template download may fail: use a permitted copy or create a filled document based on the template content.

• CSV path may break when moved: keep the dataset with the workbook or use a packaged workbook where supported.

• Dashboard charts may be duplicated: check all nine views before final submission.

• Links may be private: verify sharing settings before submitting.

Success criteria

The dashboard opens, each chart answers a distinct question, documentation is complete, and all submission links are accessible to the reviewer.

Submission note: These are filled content drafts prepared from the project details available. Check them against the official SkillWallet template fields and add any required official Team ID or institution-specific information before submission.
