PROJECT DOCUMENTATION PHASE

Project Report

Student: Sheetal   Project: Global Fuel Prices and Taxation Trends Dashboard

Abstract

This project explores global fuel prices and related taxation, subsidy, income-level, and Brent crude oil measures through a Tableau dashboard.

Problem statement

Stakeholders need an accessible visual summary of fuel-price differences across countries and how those differences coexist with tax, subsidy, income, and crude-oil patterns.

Dataset overview

The supplied CSV contains 27,468 rows and 10 fields: date, country, region, income_level, subsidy_level, petrol_usd_liter, diesel_usd_liter, lpg_usd_liter, brent_crude_usd, and tax_percentage.

Methodology

• Import the CSV into Tableau.

• Aggregate numeric measures appropriately for comparisons.

• Create charts for fuel prices, taxes, subsidies, income levels, and crude-oil trends.

• Assemble and publish the dashboard.

• Interpret visible patterns cautiously; correlation does not establish causation.

Scenario mapping

• Energy Policy Consultant: country fuel-price and tax/subsidy comparisons.

• Global Supply Chain Manager: cross-country diesel and fuel-cost comparisons, plus crude-oil context.

• Energy Economics Researcher: income-level patterns and crude-oil trend analysis.

Key observations

Use the dashboard itself to report actual observed patterns. Do not invent country rankings or causal claims without checking the chart values.

Links to complete before submission

• Tableau Public dashboard URL: [Paste actual published URL]

• Demo video URL: [Paste shareable video URL]

• GitHub repository URL: [Paste repository URL]

Conclusion

The dashboard brings several related fuel-price indicators into one visual interface and provides a starting point for policy, supply-chain, and economics questions.

Submission note: These are filled content drafts prepared from the project details available. Check them against the official SkillWallet template fields and add any required official Team ID or institution-specific information before submission.
